

# STANDBY GENERATORS

# 17 kW

# Air-Cooled Gas Engine Generator Sets

### **Continuous Standby Power Rating**

Model 05504 (Steel - Bisque) - 17 kW 60Hz Model 05505 (Aluminum - Gray) - 17 kW 60Hz

### **INCLUDES:**

- True Power® Electrical Technology
- Two Line LCD Digital Controller
- Automatic Transfer Switch with Built-In Priority Load Center
- Electronic Governor
- Pre-wired External Connection Box
- External Main Circuit Breaker,
   System Status & Maintenance Interval LED's and GFCI Duplex Outlet
- Flexible Fuel Line Connector
- Composite Mounting Pad
- Pre-wired conduits
- Natural Gas or LP Gas Operation
- UL 2200 Listed

## **FEATURES**

- INNOVATIVE DESIGN & PROTOTYPE TESTING are key components of GENERAC'S success in "IMPROVING POWER BY DESIGN." But it doesn't stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.
- TRUE POWER® ELECTRICAL TECHNOLOGY: Superior harmonics and sine wave form produce less than 5% Total Harmonic Distortion for utility quality power. This allows confident operation of sensitive electronic equipment and micro-chip based appliances, such as variable speed HVAC.
- O TEST CRITERIA:
  - ✓ PROTOTYPE TESTED
- ✓ NEMA MG1-22 EVALUATION
- ✓ SYSTEM TORSIONAL TESTED
- MOTOR STARTING ABILITY

- SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION. This state-of-the-art power maximizing regulation system is standard on all Generac models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine.
- SINGLE SOURCE SERVICE RESPONSE from Generac's dealer network
  provides parts and service know-how for the entire unit, from the engine
  to the smallest electronic component. You are never on your own when
  you own a GENERAC POWER SYSTEM.
- GENERAC TRANSFER SWITCHES. Long life and reliability are synonymous with GENERAC POWER SYSTEMS. One reason for this confidence is that the GENERAC product line includes its own transfer systems and controls for total system compatibility.

	•Generac (OHVI) Design	Maximizes engine "breathing" for increased fuel efficiency. Plateau honed cylinder walls and plasma molly rings help engine run cooler, reducing oil consumption. Because heat is the primary cause of engine wear, the OHVI has a significantly longer life than competitive engines.				
	"Spiny-lok" cast iron cylinder walls	Rigid construction and added durability provide long engine life.,				
ENGINE	•Electronic ignition, spark advance and compression release	These features combine to assure smooth, quick starting every time.				
H	•Full pressure lubrication system	Superior lubrication to all vital bearings means better performance, less maintenance and significantly longer engine life. Now featuring a 2 year/200 hour oil change interval.				
	•Low oil pressure shutdown system	Superior shutdown protection prevents catastrophic engine damage due to low oil.				
	•High temperature shutdown	Prevents damage due to overheating.				
	•Revolving field	Allows for smaller, light weight unit that operates 25% more efficiently than a revolving armature generator.				
OR OR	•Skewed stator	Produces a smooth output waveform for compatibility with electronic equipment.				
ERAT	•Displaced phase excitation	Maximizes motor starting capability. Provides more surge capability than brushless generator designs.				
GENERATOR	Automatic voltage regulation	Regulates the output voltage to ±2% prevents damaging voltage spikes.				
	•UL 2200 Listed	For your safety				
TRANSFER SWITCH	•Fully Automatic	Transfers your vital electrical loads to the energized source of power.				
	•Remote Mounting	Mounts near your existing distribution panel for simple, low cost installation.				
TRA	•UL Listed	For your safety-				
	•Manual/Auto/Off switch	Selects the operating mode.				
	•Utility voltage sensing	Constantly monitors utility voltage, setpoints 65% dropout, 75% pick-up, of standard voltage.				
10	•Utility interrupt delay	Prevents nuisance start-ups of the engine, adjustable 10-30 seconds.				
NTROLS	•Engine warm-up	Ensures engine is ready to assume the load, setpoint approximately 10 seconds.				
I NC	●Engine cool-down	Allows engine to cool prior to shutdown, setpoint approximately 1 minute.				
S	•Seven day exerciser	Operates engine to prevent oil seal drying and damage between power outages.				
	•Timed Trickle Battery charger	Maintains battery amperage to insure starting.				
	•Main Line Circuit Breaker	Protects generator from overload.				
L	•Weather protective enclosure	Ensures protection against mother nature. Hinged key locking roof panel for security. Lift-out front for easy access to all routine maintenance items. Electrostatically applied textured epoxy paint for added durability. Model 05505 has an aluminum enclosure.				
END D	•Enclosed critical grade muffler	Quiet, critical grade muffler is mounted inside the unit to prevent injuries.				
	•Small, compact, attractive	Makes for an easy, eye appealing installation.				
Z	Pre-wired External Connection Box	Easy Installation - Virtually all hardware included, plus step-by-step photographed Installation Guide.				
O I	•1' Flexible Fuel Line Connector					
LLASTE	•Composite Mounting Pad					
INSTALLATION SYSTEM	Pre-wired conduits					
2	•UL Listed wire nuts

CONTROLS			
2-Line Plain Text LCI	D Display	Simple user interface	for ease of operation
IVIDGE SWITCH			

CONTROLS	
2-Line Plain Text LCD Display	Simple user interface for ease of operation
Mode Switch	
-Auto	Automatic Start on Utility failure. 7 day exerciser
-Off	Stops unit. Power is removed. Control and charger still operate.
-Manual/Test (start)	Start with starter control, unit stays on. If utility fails, transfer to load takes place.
Engine Start Sequence	Cyclic cranking: 7 sec. on, 7 rest (90 sec. maximum duration)
Engine Warm-up	10 seconds
Engine Cool-Down	1 minute
Starter Lock-out	Starter cannot re-engage until 5 sec. after engine has stopped.
2.5 Amp Timed Trickle Battery Charger	Standard
Automatic Voltage Regulator w/Overvoltage Protection	Standard
Automatic Low Oil Pressure Shutdown	Standard
Overspeed Shutdown	Standard, 72Hz
High Temperature Shutdown	Standard
Overcrank Protection	Standard
Safety Fuse	Standard

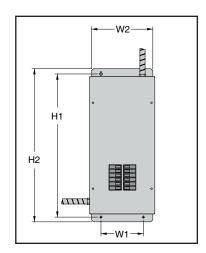

Rating definitions - Standby: Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BS5514, ISO3046 and DIN6271). \* Maximum wattage and current are subject to and limited by such factors as fuel Btu content, ambient temperature, altitude, engine power and condition, etc. Maximum power decreases about 3.5 percent for each 1,000 feet above sea level; and also will decrease about 1 percent for each 12° C (10° F) above 15.5° C (60°F).

- Electrically operated, mechanically-held contacts for fast, positive connections.
- Rated for all classes of load, 100% equipment rated, both inductive and resistive.
- 2 pole, 250 VAC contactors.
- 160 millisecond transfer time.
- Dual coil design.
- Main contacts are silver plated or silver alloy to resist welding and sticking.
- NEMA 1 (indoor rated) enclosure is standard on the 100 amp switch.
